PROJECT NAME	CRUDE OIL PRICE PREDICTION

### **PROJECT OBJECTIVE :-**

Up and down of price in crude oil have a far-reaching impact on global economies and thus we need price forecasting which can assist in minimising the risks associated with fluctuation in oil prices. Price prediction are very important to various stakeholders: governments, public sector, policymakers, and investors and business.

### **By the end of this project, you will be able to:**

- Know fundamental concepts and techniques to predict the price of the crude oil.
- Gain a broad understanding of time series data
- Know how to split the data for time series forecasting.
- We would able to know how to build a web application using the given development kit.
